

Access your institute's network or the internet using an encrypted connection

Secure Institute Access

eduVPN provides access to private networks where end-users can access internal resources within their institute.

Secure Internet Access

eduVPN provides secure and privacy preserving access from public networks by providing secure gateways to trusted networks

Secure

- Uses VPN technology audited by the international community
- Strong Cryptography
- Audited servers and apps

Privacy Enhancing

- “Privacy by Design”
- GDPR Compliant
- Helps avoid data leakage through insecure WiFi

Trusted

- Software approved by GÉANT
- Fully open-source and transparent
- Servers operated by NRENs and Institutes
